Faith Arise
COMMUNITY CENTRE

Our Motto

“Providing care for holistic growth and development of children”

ABOUT US

FAITH ARISE COMMUNITY CENTRE (FACC) is a Non-Profit Making Non-Governmental Organization that addresses the needs of orphaned and vulnerable children as well as marginalized women and girls in Zambia's rural and urban communities through programs in education, health, shelter and empowerment. We are committed to contribute to government efforts in ensuring that vulnerable communities in both rural and urban Zambia have access to basic needs that are not limited to education, health, clean water and sanitation as well as adolescent sexual reproductive health and menstrual hygiene management.

FACC Help Her Stay in School and Restore her dignity

OUR VISION

- Is to see a generation of young people who have been holistically developed; physically, emotionally, academically and spiritually. We see young people who have been raised in a home based environment where they experience and build family relationships with each other and their parents and believe that faith in God empowers and allows them to live and experience a future that may never have been possible given the negative situation that once surrounded them.
- We envision a community where vulnerable women are empowered to live life to the fullest without being afraid of where their next means of survival will come from.
- We envision a Centre where women and girls who have gone through various forms of abuse are able to experience free professional counseling and under-go holistic rehabilitation processes.

FACC Donation of COVID-19 prevention materials to COCS

OUR MISSION

- The Provision of a quality home care system for Orphaned Children and a safe environment where they can learn and experience family relationships and be free to dream, hope and have faith in the future they hope to see.
- The provision of free professional counseling services and empower vulnerable women with life skills that will enhance their survival in the communities they live in.
- The provision of educational support to vulnerable children in various rural and urban communities.

OUR CORE VALUES

Compassion, Relationships, Diversity, Accountability, Excellence, People and Transparency
